

Watson & Associates Economists Ltd. invites you to join this upcoming workshop series.

Workshop Key Features:

Defining
Levels of
Service

Developing
a Lifecycle
Management
Strategy

Knowledge
Transfer &
Templates
for Future
Use

Workshop Objectives:

- Develop a levels of service framework for one or two asset classes/service areas
- Develop a lifecycle management strategy for one or two asset classes/service areas
- Utilize templates and learn from experts and peers to better position your municipality to work towards compliance with Ontario Regulation 588/17 and beyond

Workshop Format:

- The workshops will be undertaken in small groups of up to ten municipalities
- Each workshop will be delivered in two half-day sessions, over the course of two consecutive days
- Participants will be provided with a general introduction to the topic (levels of service and lifecycle management strategies), an overview of relevant regulatory requirements, and applicable best practices
- The focus of each session will be to work with templates and complete/customize them with help from the workshop facilitators for each participating municipality
- Participants can expect to leave the workshop with a well-defined levels of service framework and a fully defined and costed lifecycle management strategy for one asset class
- Additionally, the templates used in the workshops will be available for participants to use as they complete this work for other asset classes/service areas
